## Bio

With a decade of experience in teaching IT at high school level, Alex is recognized for his dynamic teaching style and deep knowledge of computer science. Alex continuously improve his skills to keep up with the fast-paced evolution of technology and try to deliver the best to students.

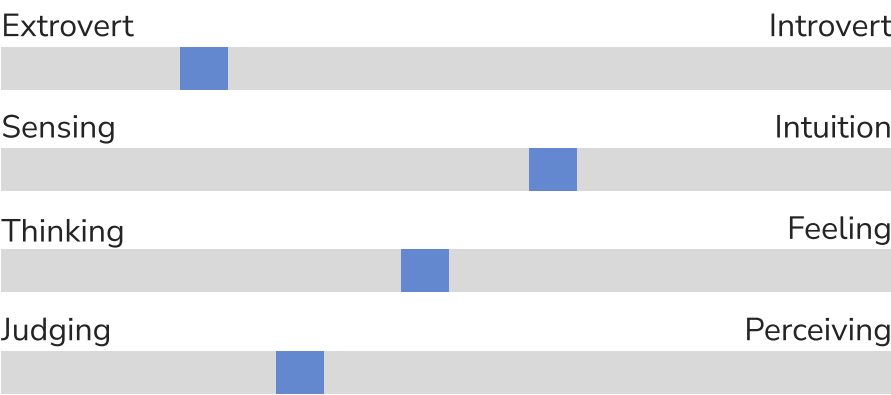

## Motivations

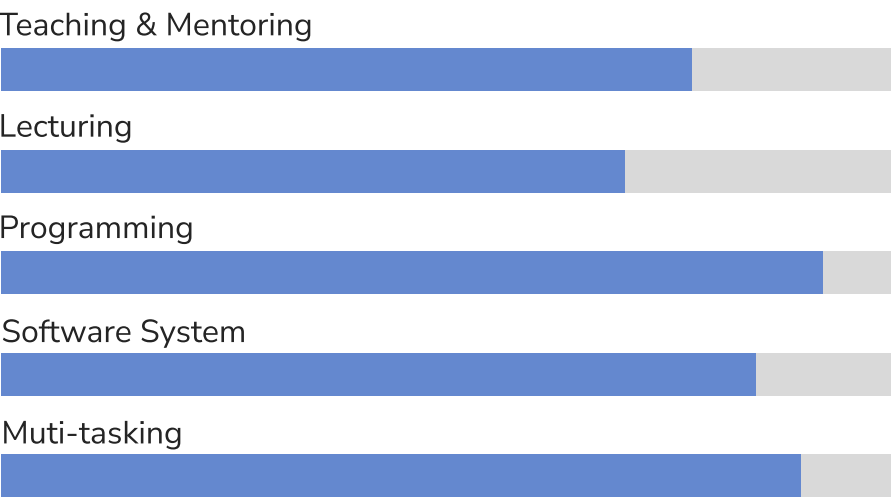

## Frustrations

- The current education system’s setup and maintenance require too much manual effort.
- Lack of standardized assessment tool for evaluating students’ competencies
- It’s challenging to adapt teaching methods for students with diverse skills.

## Personality

## Technical Skills

## Goals

- Reduce the work time for evaluating students' competencies
- Integrate teaching tools for diverse learning style to help better scoring.
- Ensure that students' performance in different areas can be properly assessed
